## CHAPTER 10. *Retirement*

Both the number and the percentage of older people in the United States are increasing every year. The proportion of our population age 65 or over has more than doubled in the last 50 years. Retirement is thus becoming a reality for more and more people and has become a matter of economic importance to the worker in all levels of employment.

This is particularly true for members of the Federal work force because of the comparatively early age at which an employee can retire after completing his career. The fact that under the liberal benefits of the Civil Service Retirement System a relatively large number of employees do not have to live and work to an advanced age before they can enjoy the relaxation of retirement is one of the major attractions of Federal employment. The Civil Service Retirement System is of significant value to the Federal Government's program to recruit competent employees and to retain them during their most productive years.

The realization that people, especially Americans, are living longer has sharply increased the number of public and private pension plans and programs. However, the many liberal advantages and benefits of the Civil Service Retirement System continue to make it an outstanding system among the many retirement plans now in existence.

This chapter and the statistical tables contained in appendix C constitute the Commission's report of its administration of the Civil Service Retirement Act.

### NEW LEGISLATION

The first session of the 86th Congress enacted three laws affecting the Civil Service retirement system.

Public Law 86-91, approved July 17, 1959, provides that if a teacher in an overseas dependents' school accepts other Federal employment during a recess period, such employment shall not be subject to the Retirement Act.

Public Law 86-168, approved August 18, 1959, continues retirement coverage for certain employees serving under Federal land banks, Federal intermediate credit banks, or banks for cooperatives after December 31, 1959.

The method of crediting service for United States Commissioners subject to the Retirement Act was liberalized by Public Law 86-306, approved September 21, 1959.

## RETIREMENT OPERATIONS

Retirement activities continued at the high level established since the enactment of 1956 amendments which provided for more liberal benefits. The following table shows the volume of activity during fiscal year 1959 by major work items.

	<i>Received</i>	<i>Processed</i>
Retirement claims-----	56,820	54,745
Death claims-----	51,916	52,113
Refund claims-----	155,092	156,570
Claims for deposits-----	33,190	33,626
Answering inquiries-----	238,427	237,946
Searching and filing retirement records--	1,614,272	1,608,056
Maintaining annuity roll (average number on roll for fiscal year)-----	449,440	

In addition to the regular work activity, implementation of the following provisions of Public Law 85-465, which was enacted on June 25, 1958 and described in last year's report, was completed during fiscal year 1959:

- A 10 percent increase in retirement and survivor annuities for most annuitants.
- Payment of annuities, under certain conditions, to widows (and widowers) of employees and retired employees who died before February 29, 1948.
- Recomputation of annuities in those cases in which an employee retired for age before July 31, 1956, but had sufficient annual leave to have carried him as an employee to that date.

The interval between enactment and the effective date of this law was so short that a crash program was necessary to implement its provisions. In processing the annuity increases, a notice was drafted and enclosed with the regular monthly annuity checks explaining the increase and thus saving the mailing and postage cost of sending some 400,000 notices. A plan for mechanically recomputing the annuities by means of punched cards was evolved with the cooperation of the Treasury Department thus materially reducing the cost of computing the changes in rate. These actions and others resulted in the annuitants receiving their increases in the September 2, 1958 check—on time.

In processing payments of annuities to "pre-1948 widows" under this law, an application from the claimant was necessary. Informational and press releases were drafted, therefore, and employing agencies, regional offices, and employee organizations were informed on the procedure for claiming benefits. A new work sheet was devised which expedited the computation of the annuity under the numerous formulae in effect prior to 1948 and saved hundred of hours of adjudicating time.

Implementing this feature of Public Law 85-465 was very successful, and on September 2, 1958, the earliest date on which a "pre-

1948 widow" could be paid, 9,000 were sent annuity checks. Nearly 18,000 claims have been approved to date.

#### STATUS OF THE RETIREMENT FUND

During the year, the Board of Actuaries of the Civil Service Retirement System made a periodic valuation of the System as required by the Retirement Act. A special report summarizing the results of the valuation was submitted to the Commission and was transmitted to the Congress.

The Board estimated that the total normal cost of the current benefit provisions is 13.83 percent of payroll. Of this total, employees pay 6½ percent by payroll deductions, and their employing agencies pay a like percentage by contributing from their appropriations amounts matching their employees' deductions.

The Board further estimated that, as of June 30, 1958, the unfunded accrued liability, or deficiency, was \$27,451,000,000.<sup>1</sup>

<sup>1</sup>Problems of financing the Retirement Fund have been under a joint study by the Civil Service Commission, the Bureau of the Budget, and the General Accounting Office; and reports with recommendations have been submitted to the Senate Committee on Appropriations and have been published as a Committee Print.

### APPENDIX C. *Retirement Statistics*

The following tables furnish statistical information on the operation of the Civil Service Retirement Act, as amended, and the Panama Canal Construction Annuity Act, as amended. Chapter 10 and this appendix constitute the Commission's report of its administration of these two acts.

<sup>1</sup> Based on tabulation of Treasury checks issued from regular established rolls. Totals differ from those in preceding tables, which are based on another source.

<sup>2</sup> Number of payees rather than number of individual annuitants, which is about 20 percent greater. For example, when a widow is paid annuity for herself and also annuities for her children, one check is issued rather than individual checks.
